What's in it?

Tannins, bitter principles, alkaloids and phenols.

Are all Croneswort remedies the same?

Croneswort is a unique remedy in an essence form in that it helps both sides of the brain, the right (more creative) and the left (typically more logical) side to communicate better, thus creating a more united sense of being. Croneswort also helps us to connect with our intuition more clearly.

The plantrhythm preparation of croneswort has a mixture of both essence and tincture properties. When using the remedy as more of an essence, take 3 drops up to 5 times daily as needed. For more acute physical conditions, the dose is 20-30 drops as needed.
